

International Women's Day Panel

Monday 8 March, 2-3pm EST

International Women's Day is March 8th!

Join us as we host Cochrane's International Women's Day 2021 Event! Each year Cochrane hosts an event in the name of Anne Anderson, a pioneering woman in health evidence synthesis. This year, the US Network is thrilled to be hosting the inaugural event, which will highlight the stories of five amazing women in our Network. Registration is FREE for this exciting virtual event, and we will be debuting a new online meeting platform called Hopin.

Registration: <https://hopin.com/events/international-women-s-day-panel>

(You will need to create a password to complete registration)

Panel Description

Join us as we discuss and highlight minority women and young investigators working in health science and evidence synthesis with Cochrane US. Hear about their career paths, who has inspired them, and what advice they have for other women interested in or working in health evidence synthesis. Learn about Cochrane's role in evidence Synthesis and how anyone can get involved.

Who is Anne Anderson?

Anne Anderson was a contributor to the thinking and effort that gave birth to evidence-based health care. A clinically qualified reproductive physiologist, Anne had an active interest in women's health, co-editing the first edition of Women's Problems in General Practice and contributed to Effectiveness and Satisfaction in Antenatal Care (1982). Iain Chalmers, Murray Enkin and Marc Keirse went on to publish Effective Care in Pregnancy and Childbirth (ECPC) in 1989, dedicating the book to Anne. ECPC, through its systematic approach to assessing the research literature, is widely acknowledged to have led to development of Cochrane. Each year Cochrane awards the Anne Anderson award to a woman who has made significant contributions to evidence synthesis within the Cochrane organization. Submissions for the 2021 award open in April.

Panelists

Chair:

Tiffany Duque, MPH, RDN – Cochrane US

Presenters:

Patricia Heyn, PhD, FGSA, FACRM – University of Colorado Anschutz Medical Campus

Shayesteh Jahanfar PhD, MSc, BSc – Tufts University School of Medicine

Elizabeth Centeno Tablante, MS – Cornell University Department of Nutritional Sciences

Reem Mustafa, MBBS, PhD, MPH – University of Kansas and GRADE US Network

Moderator:

Nimisha Kumar – Cochrane Pregnancy and Childbirth Review Group
